About the Opinaca Gold Project

The Opinaca Project is located in the James Bay region of Quebec, approximately 45km south of the all-season Trans-Taiga Road and 140km northeast of the Eleonore gold mine. The Opinaca Project covers 85,267 contiguous hectares of the Opinaca geological sub-province, dominantly a metasedimentary region with neoproterozoic-aged igneous intrusions including of the Vieux Comptoir suite of granites. Till sampling and prospecting work in 2023 and 2024 has identified a 7km-long gold target trend near the center of the project.

Boulder sampling in 2024 returned a dozen boulders with anomalous (>0.1g/t) gold values, including up to 6.7g/t Au. A recent airborne magnetic survey has identified a 4km magnetic anomaly at the center of the gold trend.
